STRING Biological Pathway Enrichment
Lengthening vs VCP shortening candidates
(top 10 non-redundant terms per list)
Lengthening
VCP
Negative regulation of synapse assembly
Regulation of axon extension involved in axon guidance
Mitochondrion transport along microtubule
Negative chemotaxis
Negative regulation of BMP signaling pathway
Neuron recognition
Negative regulation of axonogenesis
Cellular response to nerve growth factor stimulus
Embryonic digit morphogenesis
Long-term synaptic potentiation
Localization within membrane
Protein modification process
Cellular localization
Nervous system development
Intracellular protein localization
Negative regulation of macromolecule metabolic process
Regulation of primary metabolic process
Enrichment strength
